Distance meetings made easy with the DICENTIS Wireless Conference System

The need for people to meet and discuss important topics does not disappear during a pandemic - in fact, it becomes more critical. With the current COVID-19 situation there is a challenge to meet and maintain the requirements for physical distancing. Seating arrangements for meetings must comply with physical distancing guidelines; Decentralized meetings with all participants joining remotely is not always possible as physical attendance is often required and it is not always efficient.

The DICENTIS Wireless conference system provides the perfect solution for these needs. It optimizes speech intelligibility and meeting efficiency, while providing maximum flexibility in system set-up to apply physical distancing and the easy interfacing with third-party online communication platforms for remote participation.

See the next page for more information on what DICENTIS wireless can offer.

Distance meetings made easy with the DICENTIS Wireless Conference System

The DICENTIS Wireless conference solution provides organizations and communities with maximum flexibility: being a wireless solution, you can simply rearrange the seating in an existing meeting room or even facilitate the meeting in a larger space (e.g. sport hall) so participants can keep their distance.

Before COVID-19

Next to this, due to COVID-19 travel and health restrictions, some of the meeting participants will also need to join meetings remotely via Skype, Teams, Zoom or similar platforms. DICENTIS Wireless can be easily interfaced with applications such as these, ensuring participants can join the meeting from home while participants in the room maintain safe distances from one another.

After COVID-19

For meetings requiring flexible seat arrangements and involving remote participants, the DICENTIS Wireless Conference System provides the perfect solution.

- ▶ **Increased hygiene** due to unobtrusive high directive microphone eliminating the risk of contact with mouth and touchscreen participant devices enabling easier cleaning.*
- ▶ **Excellent audio** without interference thanks to smart wireless management.
- ▶ **Future proof** touch-screen participants devices with license expandable feature set (e.g. voting).
- ▶ **Easy battery management** with operation times up to 24 hours from a full charge.

Please contact your local Bosch representative for more details.

* For hygienic cleaning of the Bosch conference devices, including our devices with touchscreen, we recommend to use Alcohol Cleaning Wipes (up to 90% Isopropyl Alcohol).
